Summary

Seasoned architect with deep knowledge about BIM, 3D modelling, parametric design and visualization. Strong analytic and communication skills. Experienced in project management, having worked on a wide range of projects from building design to urban planning. Adept at concept development and passionate about environmental design and bioclimatic strategies.

Work experience

Sep 2018 – Dec 2019

Architect, Hauschild+Siegel, Malmö.

- Project architect for a housing project in the 'Inre hamnen' master plan in Norrköping. Development of a comprehensive catalogue of floor plans. Representing H+S at the monthly developer meetings.
- Architect for the housing project 'Det Goda Vattnet' in Lund Brunnshög. Work on façade design, daylight calculations and visualizations.

Sep 2013 – Aug 2018

Architect, Inter IKEA Systems Services AB, Helsingborg.

- Country responsible for IKEA Southeast Europe.
- Project leader for the development and delivery of conceptual projects supporting IKEA retailers.
- Responsible for the introduction and implementation of environmental analysis as part of the conceptual design of IKEA customer meeting points.

Feb 2012 – Mar 2013

Architect/BIM expert, Gunilla Svensson Arkitektkontor, Lund.

- Introduction of Autodesk REVIT to Gunilla Svensson's practice.
- Architect for the renovation project 'Landskrona Citadel' using a laser scanned point model.
- Project architect for the Arenaparken residential project in Lund.

Sep 2009 – Jul 2010

Architect/urban planner, Kragh & Berglund, Copenhagen.

- Project architect for the 'eco industrial park' in Tianjin, China.
- Various competitions and urban design projects at the intersection between architecture and landscape.

Sep 2008 – Jul 2009

Architect, MAD architects, Beijing.

- Architect in the design team of the Conrad Hotel in Beijing, and the Sinosteel towers in Tianjin exploring futuristic, organic, technologically advanced designs.

Aug 2005 – Aug 2008

Architect/urban planner, Schmidt Hammer Lassen, Copenhagen.

- Development of master plans and design of residential units for 'Tian Yi Town' in Wuxi, and 'International New City' in Changsha, China.
- Concept development, design and visualisations for numerous competitions including Barcode and Hotel Tjuvholmen in Oslo and the INSPI Hotel and Spa in Malmö.

Feb 2001 – Dec 2004

Architect, MVRDV, Rotterdam.

- Competition architect providing innovative solutions to contemporary architectural and urban issues. Involvement in more than 40 projects e.g. the 2004 Serpentine Pavillion in London, the re-development of Les Halles in Paris, the new European Patent Office in Den Hague and Pig City.

Jul 2000 – Jan 2001

Architect (trainee), ONL [Oosterhuis_Lénárd], Rotterdam.

- 'Footloose' research project, a portable prefabricated housing unit.
- 'Variomatic' project, web-based parametric design of prefabricated housing units,
- Part of the design team of the TT monument in Assen.
